

CLAIMS

Claim 1. (Previously Amended): A smoking material comprising from 6 to 30% by weight of a non-polyol aerosol generator, selected from the group consisting of triethylene glycol diacetate, glycerol triacetate, glycerol diacetate or a combination thereof, ~~up~~ from about 5% to 20% by weight tobacco, binder at not more than 20% by weight and not less than 30% by weight inorganic filler.

Claims 2 and 3. (Canceled)

Claim 4. (Original): A smoking material according to Claim 3, wherein said non-polyol aerosol generator is present in a range of about 5% to about 20% by weight.

Claim 5. (Original): A smoking material according to Claim 4, wherein said non-polyol aerosol generator is present in a range of about 5% to about 15% by weight.

Claim 6. (Previously Amended): A smoking material according to Claim 1, wherein said inorganic filler is present in said smoking material at a level of at least 35% by weight.

Claim 7. (Original): A smoking material according to Claim 6, wherein said inorganic filler is present at a level of at least 40% by weight.

Claim 8. (Original): A smoking material according to Claim 7, wherein said inorganic filler is present at a level of at least 45% by weight.

Claim 9. (Previously Amended): A smoking material according to Claim 1, wherein said tobacco in said smoking material is present at less than 15% by weight.

Claim 10. (Original): A smoking material according to Claim 9, wherein said tobacco is present at less than 10% by weight.

Claim 11. (Original): A smoking material according to Claim 10, wherein said tobacco is present at less than 5% by weight.

Claim 12. (Previously Amended): A smoking material according to Claim 1, wherein said binder in said smoking material is present at less than 15% by weight.

Claim 13. (Original): A smoking material according to Claim 12, wherein said binder is present at less than 10% by weight.

Claim 14. (Previously Amended): A smoking material according to Claim 1, wherein said inorganic filler is one or more of calcium carbonate, perlite, vermiculite, diatomaceous earth, colloidal silica, magnesium oxide, magnesium sulphate, magnesium carbonate or other low density inorganic filler materials.

Claim 15. (Previously Amended): A smoking article according to Claim 1, wherein said binder is one or more of an alginate, celluloses or modified celluloses, starches or modified starches, and natural gums.

Claim 16. (Previously Amended): A smoking material according to Claim 1, wherein said smoking material further comprises a mechanical stabilizer or strengthening material, an expansion medium or a high fat or high oil containing material.

Claim 17. (Original): A smoking material according to Claim 16, wherein said material further comprises one or more of cocoa, sugar, fibre, starch, pullulan, other polysaccharide expansion agents, foaming agents, cocoa butter, olive oil and corn oil.

Please cancel claims 18-~~30~~

31. (Previously Amended) A smoking material comprising from 6 to 30% by weight of a non-polyol aerosol generator, a binder at less than 10% by weight and not less than 30% by weight inorganic filler.

32. (Previously Amended) A smoking material consisting essentially of:

- a. an aerosol generator, being present at from 2% to 30% by weight, said aerosol generator comprising:
 - i. a non-polyol aerosol generator, selected from the group consisting of triethylene glycol diacetate, glycerol triacetate, glycerol diacetate or a combination thereof, said non-polyol aerosol generator being present at from 6% to 30% by weight; and
 - ii. a polyol aerosol generator, selected from the group consisting of glycerol, triethylene glycol, propylene glycol, polyhydric acid, and ester, a high boiling point hydrocarbon, methylene glycol, methyl citrate or a combination thereof, said polyol aerosol generator being present at from 0% to 24% by weight;

- 
- b. tobacco, being present at from about 0 5 % up to 20% by weight;
 - c. binder, being present at from 0% to 20% by weight;
 - d. inorganic filler, being present at greater than 30% by weight; and
 - e. an additive selected from the group consisting of cocoa, sugar, fibre, starch, pullulan, polysaccharide expansion agents, foaming agents, cocoa butter, olive oil, corn oil, or a combination thereof, being present at from 0% to 25% by weight.
-
